PRESS RELEASE

Reliable Camping Gear Announces Availability of Rugs Stay Down

The Patent-Pending Rug Weighting Solution for Campers & RV'ers

Phoenix AZ— September 4, 2019 Today, Reliable Camping Gear announced the immediate licensing availability for Rugs Stay Down. The company's weighting solution eliminates the need for rocks or rug stakes to secure Patio Mats or large camping rugs onto hardscape, cement or asphalt camping sites. "Rugs Stay Down makes camping safer as thousands of campers have experienced injuries by tripping or falling on placed rocks or protruding rug stakes. Our Rug Stays are low profile and filling the Polybags with steel shot provides over sixteen (16 lbs) pounds per rug stay. This keeps Patio Mats secure in gusty conditions and reduces injuries.," said Jeff Davis, Co-Founder & Product Designer, at Reliable Camping Gear .

"The consistent acknowledgment and positive camper feedback have been a testament to the need for such a Patio Mat weighting solution. Every camper who has seen the Patio Mat Stays said they would buy them.," said Doug Razzano, Co-Founder, at Reliable Camping Gear.

Availability

Rugs Stay Down is available for licensing immediately. The company has a full line up of Camping and Canopy weighting product designs available for licensing.

###

Company Information

Reliable Camping Gear designs accessory products for the RV, Camping, and Shade Canopy markets. Our patent-pending product designs are focused on consumer safety, use case innovation to protect, secure, and stabilize camping equipment and accessories in inclement weather, and to enhance the outdoor experience.
